The Arctic ~~scientist~~ scientist

One day there was a boy called Jake
 And he was a Arctic scientist. On Monday
 He went outside today he was going to discover
 about Arctic hare. He was looking for
 one for 10 minutes. Then he saw something
 camouflaged. And it was the Arctic hare.
 so on his clipboard he wrote Arctic hares
 are camouflaged in the snow. then he
 heard soft steps so he hid because a Arctic
 fox was looking for a Arctic hare to eat.
 then when the Arctic fox gave up ~~the~~ Jake
 could write more facts. Then the Arctic
 hare ran away and when he was running he
 could jump very far. So Jake wrote that
 on his clipboard. then Jake was going to do
 one more fact then he ate it. then the Arctic
 hare jumped ~~into~~ into the snow and dug through
 the snow and came out on the other side.
 So he wrote that down then went back home
 and went to sleep. The next day Jake decided
 that he was going to discover a polar bear
 it's the ruler of the Arctic it is very dangerous.
 so he went out and it took 1 minute to find
 one so the first fact he wrote was it has a lot of
 fur on its body. the second fact he wrote
 was it's a dangerous creature.

And the last fact it eats a lot then

he got all his stuff and got on his plane

and went back to the k. then when he

got home he sold his parents all the pots

to the polar bear and the Arctic hare.

then he got in his bed and went to sleep

the next day he went back on his plane

to the Arctic and this time he was going to

discover a Arctic fox so he was searching for

one for 15 minutes then he found one the

first fact he wrote was that he could jump

in snow and dig throw it just like the Arctic

hare could. then the second fact he wrote

was that it could camouflage itself just like

the Arctic hare could. And the last fact

he wrote was he could eat food very fast.

then he got on his plane again and went home

when he got home he sold the pictures of the Arctic

fox to his parents. then the next day Jake

went one more time to the Arctic to discover

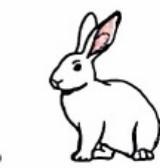

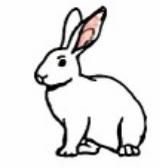

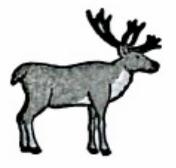

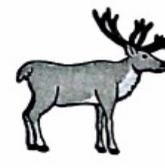

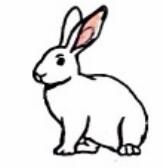

about the whale he wrote ten facts

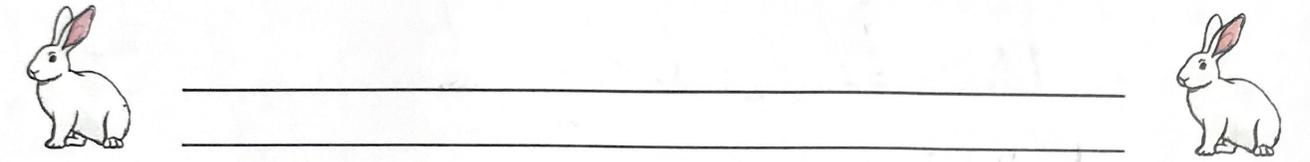

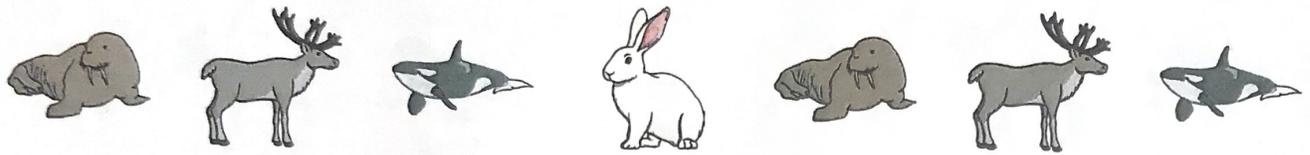

that he can't tell you then he went home

and sold his parents the pictures then

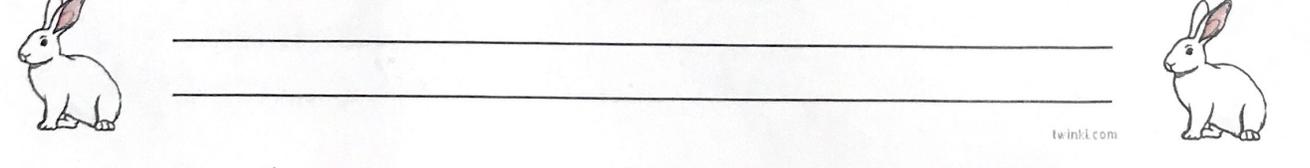

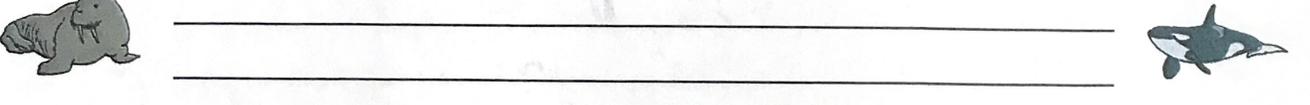

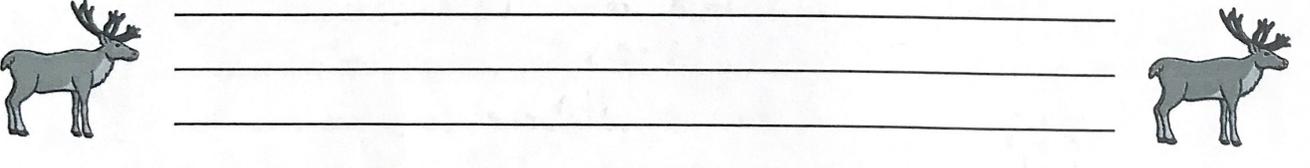

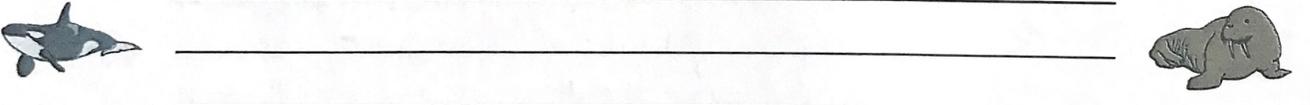

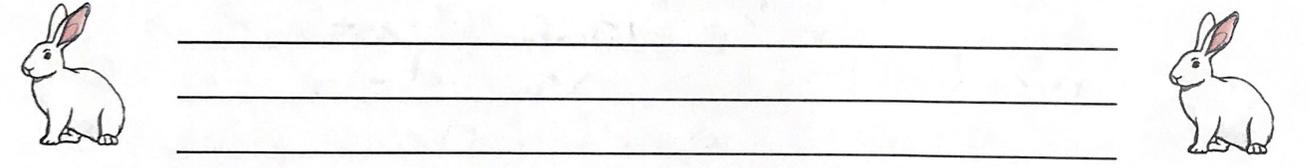

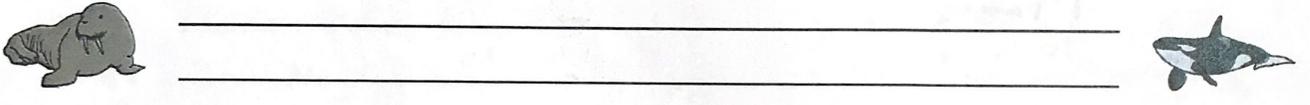

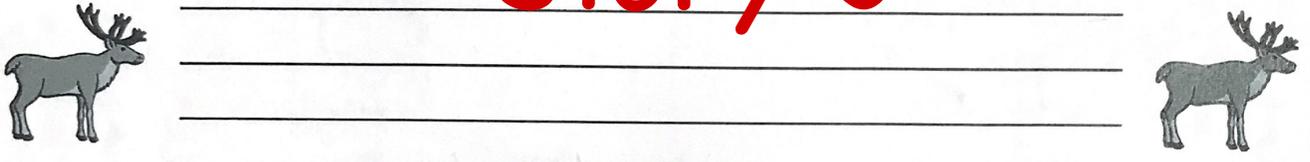

he went in his bed and went to sleep.

Story 3

The Arctic - Scientist BY AVSAM

As most people know the arctic is in the North of the world in green-land and one day I went to the arctic and go investigate the beautiful cold Iceland. 3 days later I Arrived at the Arctic and went to the Tundra. Well there is no trees or plants at sight! so while I was walking I saw a small creature jumping in the snow a small white hair in the snow it was so camouflaged I could barely notice in the SNOW! And that was the end of day 1

Day 2:

Mc and my crew woke up to eat breakfast. We had to camp and go to travel South and WE SAW THE MIGHTY POLAR Bear and THE Whales they were massive! We stumbled back to camp and slept like for the Night.

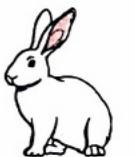

Day 3:

What I really also include PENGUINS

So we went there and we saw thousands of Pinguins like:

- Adeland . P
 - Snows . P
 - Mawshy . P
 - 'Rohel' . P
- And more

So we took some photos with them played with them and
 got them

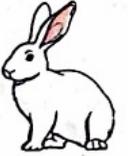

Day 4:

So we ended up trying some reindeer
 So we saw some beautiful muskoxen
 and we found the the houses were amazing

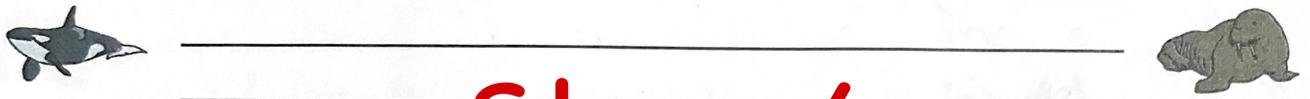

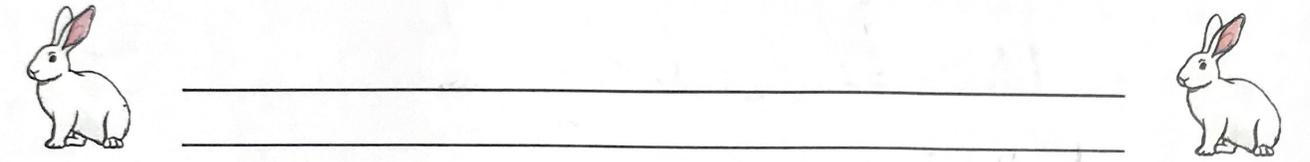

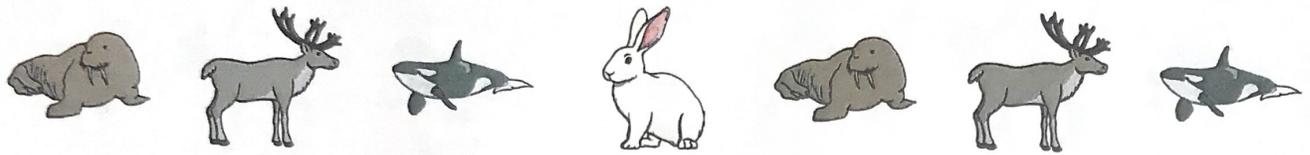

Day 5: The End

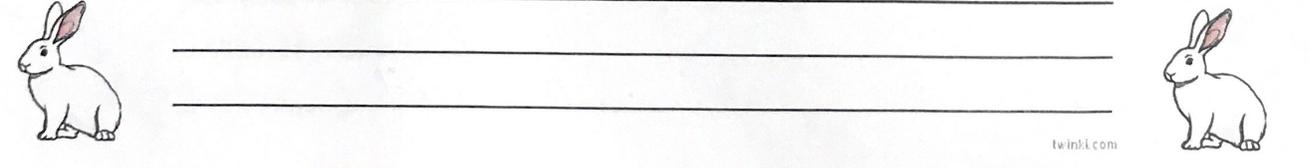

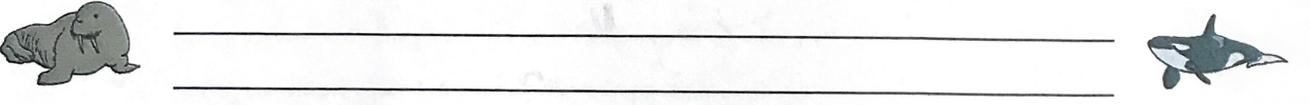

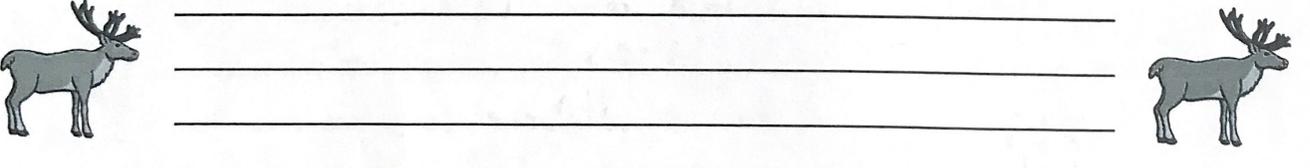

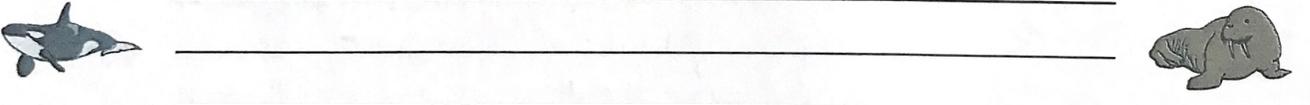

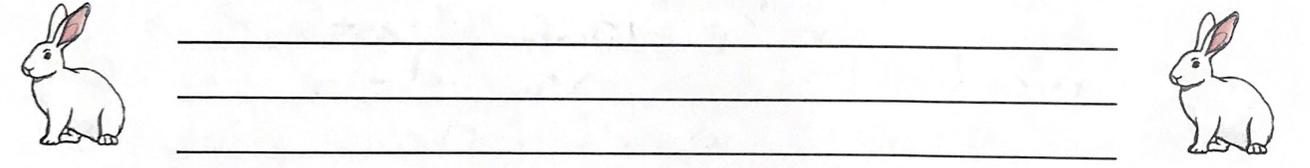

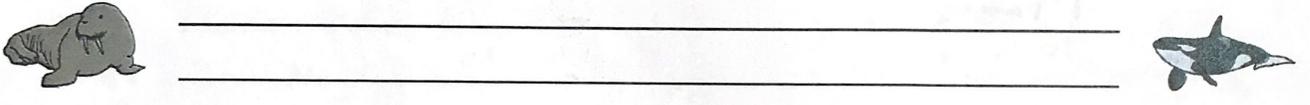

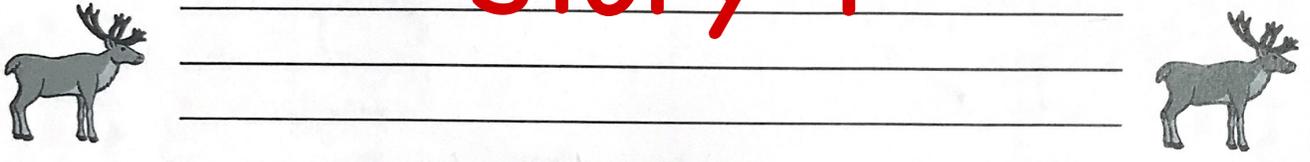

Our final stop of the trip we said goodbye
 and left The Arctic.

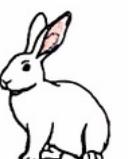

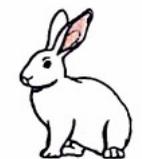

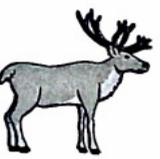

Story 4

The Arctic!

A new day had just arrived as Fatimah was walking. She was getting ready to a trip through the arctic. I wrapped up thousand of clothings She left the front door slowly she already felt hot but she knew it would be very cold there so she stepped into the big blue boat with her mum and dad and also her three sisters Ruqaiyya black hair and she is thirteen (13) (The oldest) Sanna glasses and she is eleven (11) second oldest and last but not least Aisha who is six (6) (The youngest) The driver was in we all sat on two big benches and get our self all strapped in 'Ready To Go' Shouted the driver 'yes' we shouted back 'We are ready and the before we knew it the boat was going at super fast speed. grabbing on for dear life the crazy driver started to slow down because as I looked at him he heavily fell out a few minutes later we had stopped and were there we all slowly stepped out and

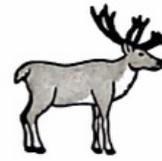

Saw my icy icy. Ice was everywhere. We could barely walk and the Artic Shoes didn't help one bit. So we just had to bare the South of earth very cold immediately I took one bit step and I already felt cold. "I know it would be this cold" said my oldest sister Ruqaiyya as we carried on walking we saw a fox in action as it pounced up to grab a rabbit the rabbit ran the same plunged down into the snow In the water we saw a lot of hump whales orcas and even a hammer head shark it broke a piece of ice and went through another piece of huge ice. Then we carried on walking we saw some reindeer's munching and hunting we saw walrus and eels laying on big pieces of ice one water and land - We carried on going slipping but not even going that fast. ~~they~~ we carried on we saw more rabbits jumping happily skipping.

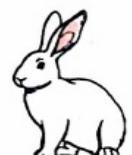

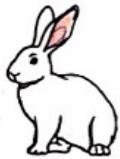

Fabemeth

There are no plants there and there are like 1 or 2 trees. The bit has no trees is called Tunara. As we walked a bit faster we saw penguins but the penguins had the special layer of blubber and they used it to keep warm. The blubber is the colour of them. We also saw polar bears. They also had blubber and lots of it. So we watched him walk around with the other polar bears. Then we all walked around dancing happily around. We had a snow ball fight. Then we went in the water on an ice block standing then sitting whilst we were throwing massive snow balls. It was hard we only stayed on for about 1 second well that what I think it was at least. Then we decided to go home we went back into the boat. This time the driver went slowly so it took us a long

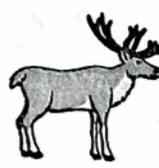

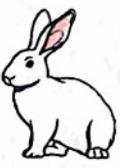

time in the boat we played
 a lot of games but
 when we were in the boat we
 realised there was a storm
 and a ~~water~~ ~~near~~ great
 hammer head shark came charging
 at ~~you~~ us we were all sat
 down got up and swam we swam
 the rest of the whole way home
 the we were by home whilst
 the driver distracted the hammer
 head shark we got home
 safely and I don't know about
 the driver it was about 7:30 so
 we had a something to eat
 which was pizza obviously or
 PASTA I had the pasta and a
 small slice of pizza then we
 all went to sleep. before we
 went to sleep were talking
 about the article and trying
 to describe it with A all the
 whole way up to 2 when
 we realised that after we were
 all just asleep. That was
 the story of the ARTICLE!!

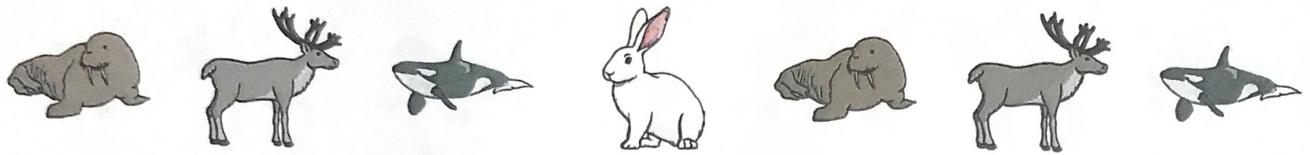

Fatemah

So the next day fatemah
 woke up and decided to write
 about this amazing day. She wrote
 about this book and ~~bring~~
 she would bring it everywhere and
 she showed everyone and from
 that day onwards shig kept
 the book and she didn't want
 to lose it. She kept it
 forever and ever. She never took
 it out he hands and read it
 constantly and over and over
 again. That book was her
 favorite book ever she treasured
 it and never lost it she bring
 it as every where and any
 where she went even if
 it was to the back yard
 she never put it down or
 even she never let go
 off it.

Animals!

The Arctic is known for many animals like:

- polar bear
- penguin
- snowy owl
- walrus

And many people say that half of them live in the water and that is hard of times and it

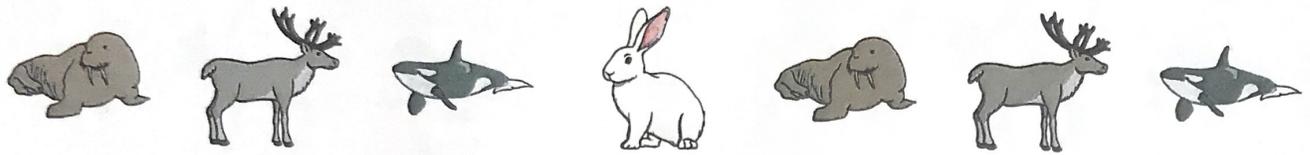

make sure you wear shoes on the snow and you must shoes collect snow shoes and you use these to make sure you don't get stuck in the snow with your normal shoes! And you may be thinking the Arctic doesn't have much animals; well it has around 21 thousand or even more! Many people have visited the Arctic to just take a look around and some people actually just to take a photo graph of it so they can show it and this takes around 1 month or over the year there, some birds and show the picture. But many people say there is only a one colored eyes person but there is also a yellow eyed one.

Today we will teach you all about the Arctic my name Chopper and I am where with my friend

Nami. Now we begin before you get to the Arctic you might see big chunks of ice which are

called icebergs, on one side of the Arctic is called the tundra it is so cold for trees to grow.

Now we will talk about the animals in the Arctic number one is the Arctic Hare it uses its fur to hide

from predators this is also called camouflage, number two is the Beluga whale just like the Hare

it is white. it has something called blubber which keeps them warm in water but like all other

animals it needs to breathe using its head it breaks the ice allowing them to breathe but predators

could be waiting there which is risky. Number three Caribou which is a type of deer when

it is Summer or Spring they move to the other side to eat grass, moss and lichen but it is also

vunreable to predators. Number
 four is the Orca it is almost
 the same as Beluga Whale. They
 both live in water they both
 have blubber but Orca kill
 other whales with their family
 which is called pods which gave
 Orca the name killer whales. Now
 this is where we end.

Story 11

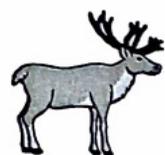

The arctic Vet of the tundra ice.

Long, Long ago there was a very friendly vet who lived on a smoothed-out iceberg tip. The Vet loved animals and cared for them every other day.

One day it was puffins next was polar bears next was penguins and so on. The animals trusted her alot so if their blubber was cut they'd show her or a molars' tusk would be sawed off but

who was the culprit of all this mischief. Nobody knew.

Arctic hares, snowy owls, arctic foxes or wolves and even beluga whales, humpback whales and baby vile sharks trusted her and relied on her. All the time she'd see reindeers migrating and having holidays at loads and loads of pine cone-trees forests. She'd always enjoy watching auroras glistening in the night as they shot their blooming colours.

One day, there was a molnarine who killed an arctic hare and its fur coat was given to the vet, she was clueless why but then it ^{actually} was a gift for her a lovely warm coat beautiful and soft like a big plashie that you sink into.

But in the misty of the cold icy water was a big ^{who was} ~~oreat~~ very very very EVIL! It always ate the finest fish of the Arctic for tea.

twinkl.com

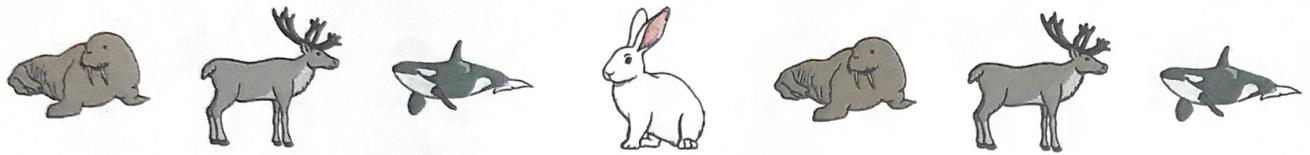

One day, a reindeer trotted to the orca and said "there's a net saving all the animals!" The orca then replied "we shall kill her and eat her for lunch", then the reindeer said "I don't think she'll taste sweet she'll probably stink and rot when we do". So they decided to push her in the ice deep down and freeze her to death. So the Vet was walking back to her iceberg home and then... The Orca swam up, said pushed her deep, deep, deep down and nobody saw her again...

Suddenly I heard a voice "We need to find her because the prince needs her" They said but then they saw us they started the sleeping pill into her and I was crying. They took me and her in the van and drove off. When I was in the car I recorded a video and sent it to the world so they could see but then every one rushed to save her and went to Arctic And every one screamed to release the girls but then the police came and took the hunters in to jail so after the

Now let me talk about night the green pretty light know as northern light has fascinated people for 1000 years and you can only see them at night and some time its dark for full 24 hours and the sun does not set and the sun doesnt set. Now do you know you might think its north pole but actually its south pole and there's 21000 in the arctic. Did you know when it summer it rains and it packed with snow and ice that its so cold it has no trees. In 1923 they found droppings of eels and if the whale catch so much fish to fill the fat and not eat for the whole summer in water it is warm for them I know so lucky and help them slow fish they die because seals get completely better not and in summer whale able strain fish by eating and they eat a lot of food my apslat summer fact it is the coldest place on earth I really really hope you liked

The Big Bully Bear

In the frozen north, a polar bear stood in a cruel snowstorm. When he saw Seal, he said "Another animal to bully, just what I want to do." Hurling over Seal,

Polar Bear grabbed him and pumiled into the icy water. Seal screamed as he went away. Then he found

Moose. "Another victim" he thought. As he ran to Moose, Moose went

sprinting. "You've bullied me before" shouted Moose. A couple of

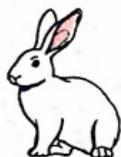

minutes later he saw Hare. A silent roll gobbled Hare brutally

and swung her over the tundra shore. Polar Bear saw Walrus and tried

to get him. But failed. So he went with

Osca, Wolf and Fox. Sadly, Polar Bear strolled to his igloo.

Hungry and tired, Polar Bear mumbled "When will I be happy," then cried in despair

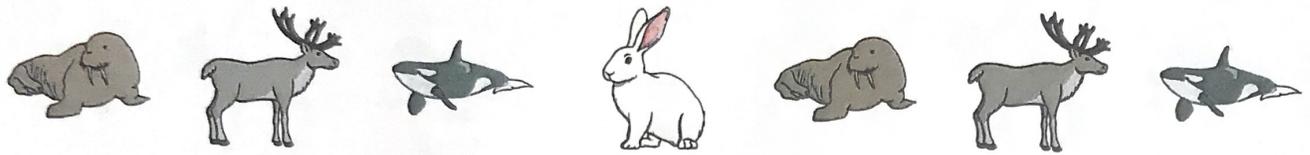

and hunger. Now all he ate was blue and green algae. He always

wondered how Musk Ox ate it. He slowly drifted to sleep emotionally.
